

MyLab Math & Stats Courses with Integrated Review

How prepared are the students entering your math or statistics course?

Students regularly come into these courses with varying prerequisite skills, and meeting each learner at their own level can be a challenge for any instructor.

MyLab Math and MyLab Statistics courses with integrated review help you personalize learning; integrating relevant review material throughout to bring each student up to speed as they need it.

These complete MyLab courses are available for all levels of math and stats.

Pre-built quizzes assess prerequisite skills for each chapter, identify skill gaps, and suggest remediation through personalized practice.

Each student gets the help they need. No more, no less. And with the flexibility of MyLab, these courses can be modified to fit any curriculum; including co-requisite courses requiring one to two hours of remediation.

See if MyLab with integrated review is right for your course.
